Background

Each year, in Harris County, there are over 40,000 calls to law enforcement for domestic violence related incidents and over 70,000 calls to area domestic violence hotlines for assistance. Sadly, domestic violence shelters turn away thousands due to lack of available bed space, and of the more than 1,200 households assessed for domestic violence housing services yearly, approximately 200 can enter safe housing options due to limited units of supportive housing.

As an agency that convenes the community to discover opportunities to improve services, Harris County Domestic Violence Coordinating Council convened a very special meeting of community stakeholders and survivors in 2016 to look at opportunities to expand the menu of services offered for families affected by domestic violence, and to increase victims' access to services and safety. This discussion was a collective opportunity for our community to think about innovative ways to go beyond the way services were currently being offered. It was also an opportunity to hear directly from survivors about the needs and challenges they faced in the pursuit of safety.

The work of the community stakeholders led to the idea of developing a flexible funding project that could prevent families who experience domestic violence from entering homelessness and reduce the amount of time families need emergency shelter services. This in turn could prioritize:

- *Increased access to services:* including, but not limited to, payment for interpreter services, payment for parking expenses, payment for mental health services, medical services, and payment to cover transportation expenses such as automobile repair.
- *Meeting basic needs:* purchase or provision of items or resources that if not available might result in impaired ability to remain healthy. These items or resources include, but are not limited to, groceries, hygiene products such as diapers, prescription and nonprescription medicines, and uniforms for school and work.
- *Increased economic stability:* financial assistance to pay for items such as, but not limited to, tuition and books, transportation to and from work or school, childcare fees, fees associated with obtaining legal immigration status.
- *Increased housing stability:* assistance to pay for items such as, but not limited to, moving expenses, first and last months' rent deposit, security deposits, necessary furniture or appliances.
- *Increased safety:* services that may enhance safety, such as locksmith services to change or install locks, filing fees for family law cases or other legal assistance.

The Evolution of Service Delivery

In 2020, the COVID-19 pandemic brought additional and unique threats to victims of domestic violence. Domestic violence services have been historically underfunded and overburdened with the inability to meet the magnitude of need, and prior to Covid, the domestic violence systems were working to recover from the impact of Hurricane Harvey. These factors compounded to create an especially precarious environment for domestic violence survivors during a time of turmoil and uncertainty. Finding and increasing solutions to safety became imperative. One solution – FLEXIBLE FUNDING.

Flexible funding has proven to be a low barrier, quick response approach to helping families with financial assistance that could prevent them from entering the homeless system as well as serving

as a tool to help a family become safer. The concept of flexible funding support is being used across the nation by other domestic violence service providers, and it has been evaluated as a proven strategy to improve safety for survivors. The Fund has assisted with move-in costs and utility bills. It has also helped with eviction prevention, back rent, car repair, day care, and tuition. The flexible funding allows advocates to ask, “what does this survivor need to become safer and more stable,” and truly meet the client where they are at, in ways that were not possible before. The possibilities seem endless.

Domestic violence service providers first rallied to adapt to the environment of social distancing and all the nuances that came with COVID-19. Then as we began to return to the “new normal”, agencies evolved and were able to offer services in new ways that became more efficient and effective. While COVID-19 was a difficult time for all, the one silver lining may be that it forced new ways of thinking when it came to service delivery, and we discovered that thinking outside the box elevated the way we could meet the client where they were.

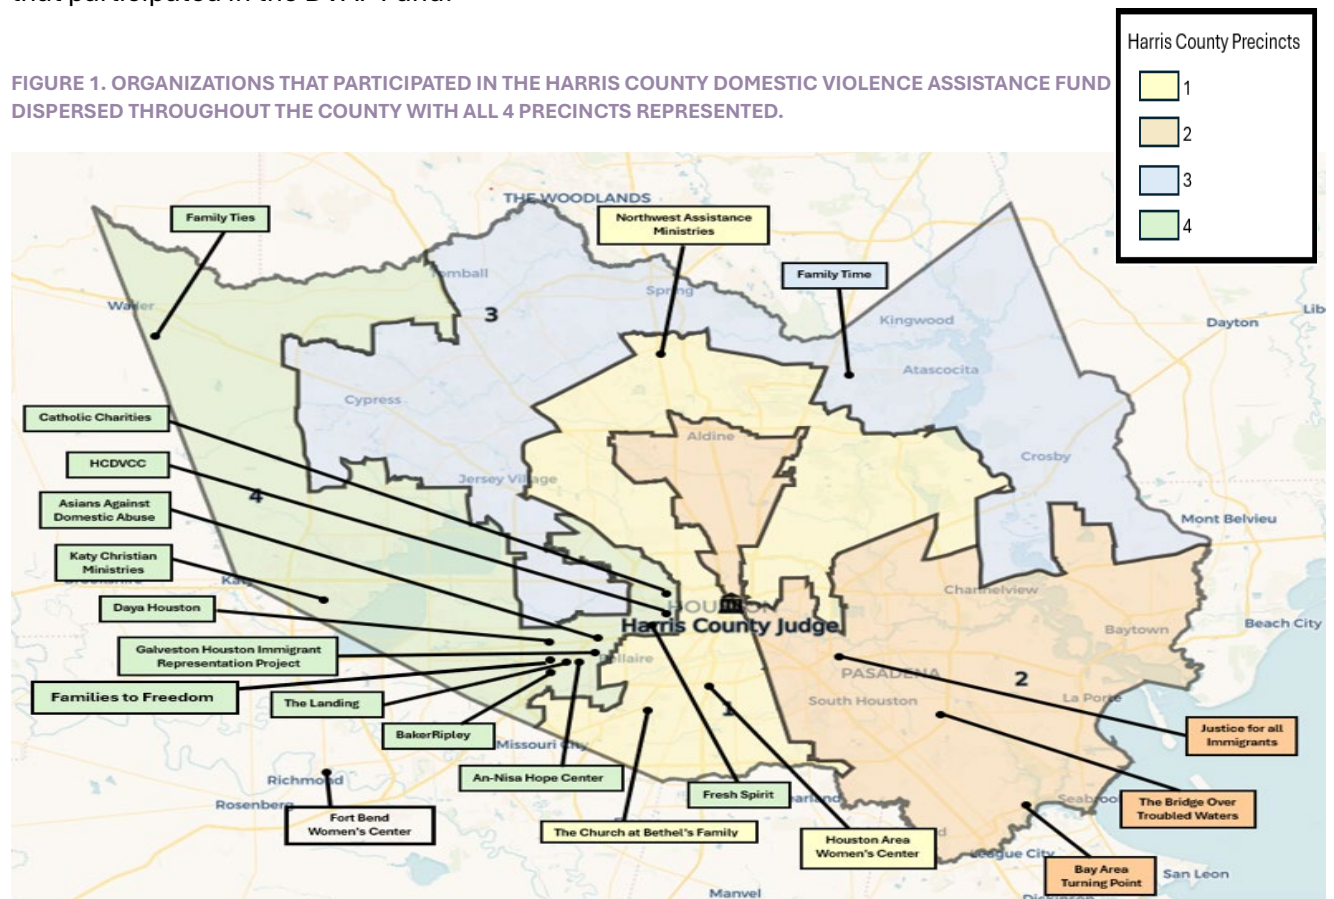

In an age of technology and digital access, paperwork was able to be sent electronically where clients do not always have to find transportation to reach agencies to receive services. We began to utilize grocery curbside orders to assist with food for families or even food delivery for those without transportation. Agencies found that gift cards are a very effective way to provide assistance quickly to clients in need, and this has evolved into the use of electronic gift cards as well. The electronic gift cards allow for almost immediate assistance without either the advocate or the survivor having to travel. This further reduces barriers to assistance for the survivors and allows more funds to be put towards direct client assistance that may have otherwise paid for the time and travel of an advocate to deliver gift cards.

Investing in Solutions for Safety

Harris County Commissioners and their staff began meeting with the Harris County Domestic Violence Coordinating Council in the Spring of 2020 to address the increasing challenges for those fleeing domestic violence. Leadership at Harris County recognized that the pandemic would increase the needs of victims of domestic violence, so the Domestic Violence Assistance Fund (DVAf) was established first with CARES ACT funding and later with ARPA funding. Administered by the Harris County Domestic Violence Coordinating Council (HCDVCC), the Domestic Violence Assistance Fund provided flexible financial relief to domestic violence survivors through community-based organizations. The goal of the Fund is to rapidly and thoughtfully aid victims of domestic violence and their families with increasing access to services and improving safety. Organizations can do so by providing basic needs assistance (e.g., food) to reduce food insecurity, flexible emergency assistance to ensure safety from domestic violence, housing emergency financial assistance to limit homelessness, childcare assistance to facilitate continued employment, and daily living supplies and other needs (e.g., personal protective equipment (PPE) and cleaning supplies). Funding for evaluation of the project was included. The first round of funding was evaluated in 2021 and showed that victims who were fleeing had increased access to safety due to the funding that was provided through the Fund (https://www.hcdvcc.org/wp-content/uploads/2024/02/HCHR-Study-Brief-Report_3.11.pdf).

In 2022, Harris County Commissioners awarded HCDVCC an additional DVAF grant for approximately \$4.7 million from ARPA funding to continue the work of the flexible funding project. Building on the success of the ARPA funded project, Harris County Commissioners created a line-item in the general county budget to award HCDVCC \$1.5 million to continue the flexible funding DVAF project for all of Harris County. This marked a historic victory for victims of domestic violence to have an intentionally targeted and funded item within the County’s budget. HCDVCC continues to partner with 19 organizations to disperse throughout the County. Many of the organizations that participated in the fund focused specifically and solely on serving domestic violence survivors; however, there is a mix of grass roots organizations helping underserved communities as well as an agency serving human trafficking survivors. The map in **Figure 1** below displays each organization that participated in the DVAF Fund.

FIGURE 1. ORGANIZATIONS THAT PARTICIPATED IN THE HARRIS COUNTY DOMESTIC VIOLENCE ASSISTANCE FUND DISPERSED THROUGHOUT THE COUNTY WITH ALL 4 PRECINCTS REPRESENTED.

“Thank you for being my foundation for the beginning of peace and safety. If I knew this kind of help was available, I would have left a long time ago.” - Survivor

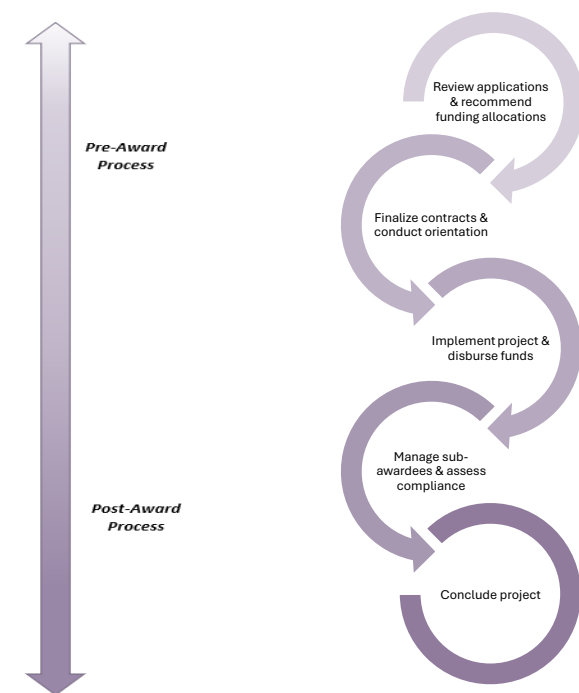

Fund Disbursement & Clients Served

Disbursement Method

HCDVCC released a request for proposals to the community in December of 2022. Agencies were invited to apply to be sub-recipients of a grant to provide flexible funding to those fleeing domestic violence in the Harris County area. A selection committee scored and recommended agencies based on the following criteria: experience serving domestic violence survivors, number of clients proposed to serve, the ability to reach under and un-served communities, and overall ability to administer the funds. Participating organizations were funded in three main categories – housing assistance, client assistance, and personnel/operating costs. Housing assistance includes rental and utility assistance, moving expenses, and hotel stays. Client assistance includes transportation costs, childcare assistance, food/basic needs, daily living expenses, medication assistance, behavioral health, legal assistance, and any other qualifying flexible assistance that aids a survivor in leaving their abusive situation and maintaining stability. The personnel/operating costs category is funding that allows recipients to build organizational capacity to address unmet needs of survivors, as well as staff, to assist with the implementation of these funds. Additionally, there is a maximum of 10% of the awarded amount that is allocated to Administrative costs.

When the additional funding was awarded in the amount of \$1.5 million to be spent from January 1, 2025 – September 30, 2025, we extended contracts with all 19 participating partner agencies and awarded them additional funds to be used between January 1, 2025 and September 30, 2025. See **Table 1** on the following page.

Funding Cycle (January 2023 – September 2025)

ORGANIZATION NAME	Amount Awarded		
	2023-2024 Award Amount*	2025 Award Amount	TOTAL Award Amount
An-Nisa	\$165,000.00	\$50,000.00	\$215,000.00
Asians Against Domestic Abuse (AADA)	\$227,500.00	\$50,000.00	\$277,500.00
BakerRipley	\$200,000.00	\$35,000.00	\$235,000.00
Bay Area Turning Point (BATP)	\$193,206.60	\$75,000.00	\$268,206.60
Catholic Charities	\$227,500.00	\$75,000.00	\$302,500.00
Daya Houston	\$65,000.00	\$25,000.00	\$90,000.00
Families to Freedom	\$122,094.00	\$25,000.00	\$147,094.00
Family Ties	\$124,000.00	\$50,000.00	\$174,000.00
Family Time	\$43,375.00	\$50,000.00	\$93,375.00
Fort Bend Women's Center (FBWC)	\$50,000.00	\$20,000.00	\$70,000.00
Fresh Spirit	\$69,582.46	\$25,000.00**	\$94,582.46
Galveston Houston Immigration Representation Project (GHIRP)	\$152,475.00	\$50,000.00	\$202,475.05
Houston Area Women's Center (HAWC)	\$227,500.00	\$75,000.00	\$302,500.00
Justice For All Immigrants (JFAI)	\$159,187.31	\$50,000.00	\$209,187.31
Katy Christian Ministries	\$92,345.00	\$30,000.00	\$122,345.00
Northwest Assistance Ministries (NAM)	\$22,000.00	\$25,000.00**	\$47,000.00
The Bridge Over Troubled Waters (TBOTW)	\$227,500.00	\$75,000.00	\$302,500.00
The Church at Bethel's Family	\$350,000.00	\$75,000.00	\$425,000.00
The Landing	\$144,440.00	\$75,000.00	\$219,440.00
TOTAL	\$2,862,705.37	\$935,000.00	\$3,797,705.42

* This award amount is an adjusted award amount that accounts for any de-obligation of funds due to lack of spending or additional funds awarded in 2023-2024.

** Funds allocated for this agency and distributed through an MOU because of undue financial barriers with the reimbursement process.

“Your generosity and thoughtfulness have truly made a difference in my life, and I am deeply appreciative. Your funding and assistance have not only provided me with furniture and gift cards, but it has reminded me the importance of kindness and compassion in our world.” - Survivor

Flexible Emergency Assistance

Flexible emergency financial assistance (providing funds directly to the client) was a novel approach to emergency assistance for many of the agencies when we started this DVAf program. Traditionally, most organizations would pay for client expenses like utility and medical bills by paying the supplier directly. However, this shift to giving funds directly to clients has allowed clients to use the funds as they see fit, with the option of splitting the funds among multiple needs. It is worth noting that the research study being conducted by UThHealth has found that many clients receiving DVAf assistance are reporting a greater level of trust in the advocates that they are working with. This is a critical finding that demonstrates this flexible funding is not only helping stabilize the survivors with their immediate needs but also building stronger relationships with the staff and agencies who are assisting them which strengthens their support system and in turn their long-term stability. In addition to being more flexible, direct monetary assistance is faster to distribute, so it can meet clients' needs more quickly. Some organizations use ACH (bank transfer) to disburse flexible assistance funds to clients. However, most agencies used gift cards (both physical and electronic), checks, or a combination of several disbursement methods. Recognizing the flexibility that direct assistance gives to clients, a common method of disbursement that

agencies are using is in the form of gift cards, with 49% of DVAF disbursements by agencies being this form of assistance in 2024. This is up from 40% of DVAF disbursements being gift cards in 2023.

Survivors were able to use the funds for needs related to childcare, transportation (car repairs, car payments, and gas), utilities (electricity, gas, and phone bills), moving (deposits, furniture, and other moving expenses), and safety (security cameras and ring doorbell systems). In the past, some of these expenses would not have been regarded by participating agencies as “basic needs.” However, the significance of some of those items (security systems) to the well-being and mental health of survivors can be life changing. The top category of assistance provided was for food assistance which accounted for 20% of all disbursements, followed by daily living expenses and rental assistance, with 17% of total disbursements each. **Table 2 below** shows the breakdown of the categories of need.

TABLE 2. PERCENT OF DISBURSEMENTS BY CATEGORY OF NEED

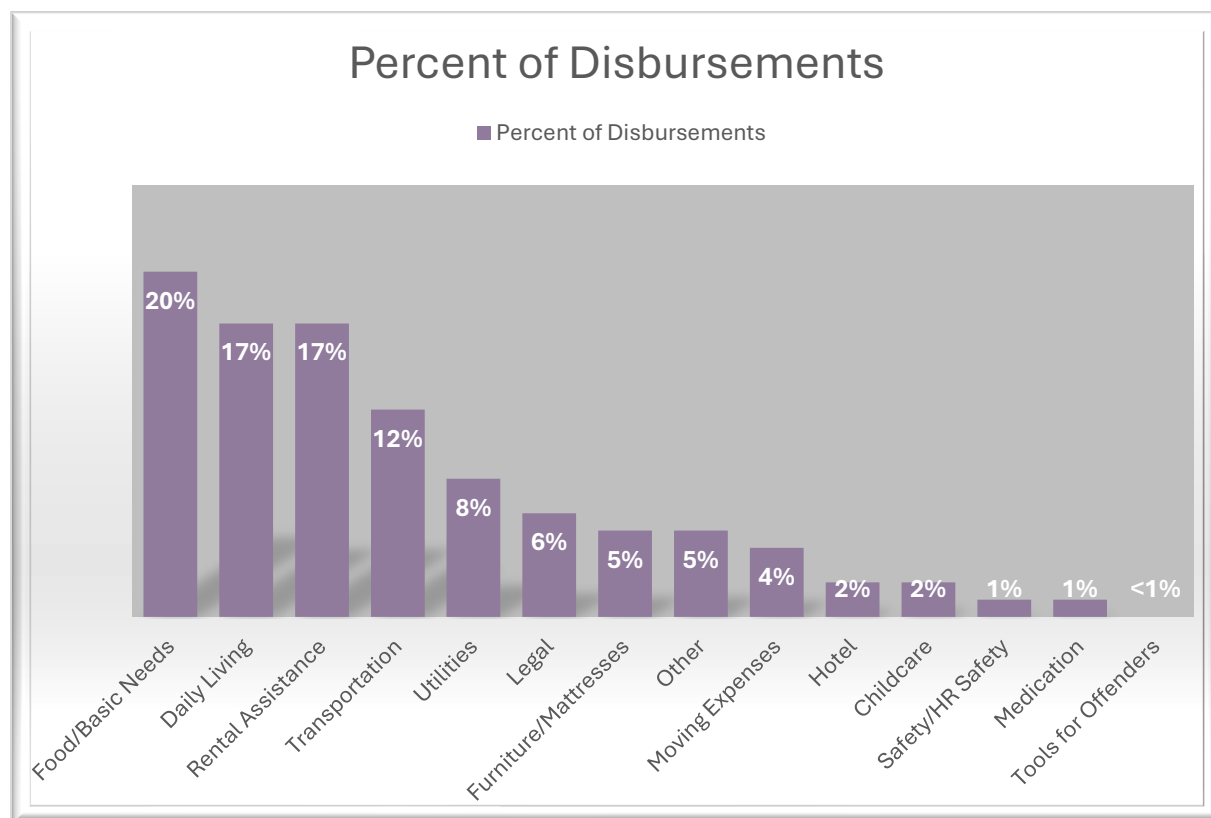

Table 3, on the following page, illustrates the percent of disbursements by agency in the client assistance category (to include basic needs, childcare, daily living expenses, legal assistance, medication, safety, safety for high risk survivors, transportation assistance, and other which is anything that doesn't fall into these categories) and in the housing assistance category (to include rental assistance, utility assistance, moving expenses, hotel stays, and furniture), as well as the percentage of disbursements by agency that were gift cards.

TABLE 3. PERCENT OF DISBURSEMENTS WITHIN EACH ASSISTANCE CATEGORY BY ORGANIZATION

DVAF Organization	Client Assistance	Housing Assistance	Assistance in the form of Gift Cards
An-Nisa	60.7%	39.3%	73.4%
Asians Against Domestic Abuse (AADA)	72.9%	27.1%	11.6%
BakerRipley	0%	100%	0%
Bay Area Turning Point (BATP)	19.4%	80.6%	30.1%
Catholic Charities	83.0%	17.0%	4.5%

Clients Served

We are safe - this program helps us make it safer for our children in our own way. My children finally can sleep throughout the night peacefully. Thank you - I can get my bachelor's degree, and my children are finally leveling up with no summer school! We are all excelling tremendously, and we would love to be a part of anything and everything for survivors or people in need, because we see how much this program has helped us. -Survivor

In 2024, the Fund served 1,207 households with a total of 3,331 individuals within those households. A total of 2,558 households and 7,317 individuals have been served in 2023-2024. By partnering with community-based organizations (CBOs) throughout the county, the Fund was able to reach a wide range of diverse and marginalized communities.

- Most survivors had children; 59% of all individuals served were children under 18 years old. This equates to 1,965 children served in 2024 and total of 4,398 children served in 2023-2024.
- Most clients served were renters (64%) and another 32% were living in a shelter or other/unknown situation, while the minority (4%) were homeowners.
- The clients served were all low income and below 60% AMI with 50% of survivors having no reported income. Other vulnerabilities included 47% of households considered uninsured, and 20% experiencing homelessness.
- Most of the survivors served were female (96%); with 3% male survivors served and a remaining 1% who identified their gender as other.

TABLE 4. CLIENTS SERVED BY AGE AND PERCENT OF VULNERABLE POPULATIONS SERVED

Finally, the majority of the survivors represented communities of color, though the demographic makeup of survivors varied by organization. Overall, 44% of survivors identified as Black or African American, 30% White, 18% Other, 5% Asian, 2% of unknown race, and both Native American/Alaska Native and Native Hawaiian/Pacific Islander were at or below 1%. Additionally, 33% of survivors identified as Hispanic, and 67% reported their ethnicity as non-Hispanic.

BakerRipley, Justice For All Immigrants, and GHIRP served the largest percentage of clients who identified as White, serving 91%, 83%, and 79%, respectively. However, these same 3 agencies also served the highest percentage of clients who identified their ethnicity as Hispanic with GHIRP serving 97%, Justice For All Immigrants serving 92% and BakerRipley serving 91%. The Church at Bethel's Family, Fresh Spirit and Fort Bend Women's Center served the largest percentage of Black/African American survivors, serving 95%, 81%, and 66%, respectively. Daya and AADA served the largest percentage of Asian survivors, serving 67% and 15%, respectively.

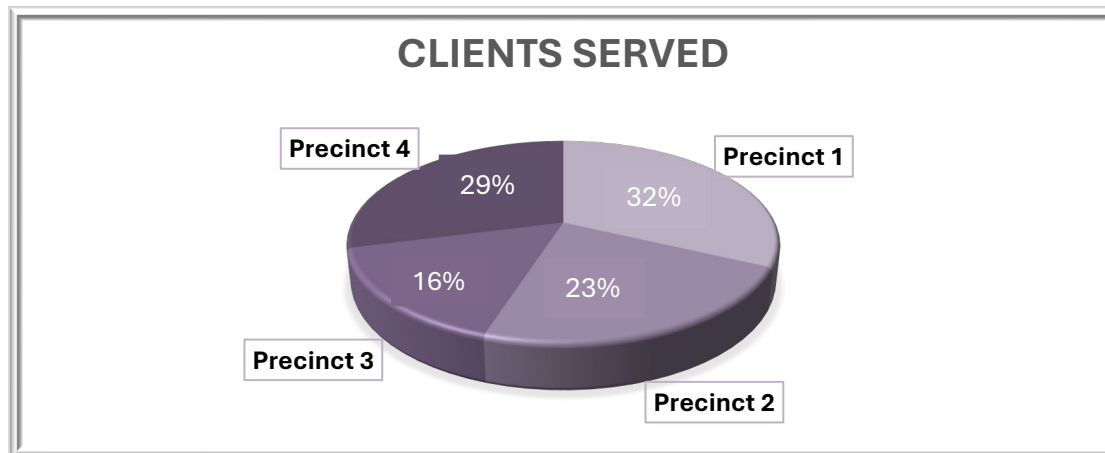

In **Table 5**, on the following page, there is a racial breakdown of clients served by each agency. The final column in this table indicates the percentage of clients served by each agency who identified as Hispanic ethnicity. The last row in gray is the racial and ethnic percentages for the entire DVAFF program for 2024.

TABLE 5. PERCENT OF HOUSEHOLDS SERVED WITHIN EACH RACE/ETHNICITY BY ORGANIZATION

DVAF Organization	American Indian/ Alaska Native	Asian	Black/ African American	Native Hawaiian/ Pacific Islander	White	Other	Unknown	Hispanic
An-Nisa	1%	10%	55%	0%	8%	25%	1%	19%
Asians Against Domestic Abuse (AADA)	0%	15%	0%	0%	7%	78%	0%	2%

While some of the survivors that were served lived near the DVAF organizations that served them, there were clients who came from almost every zip code in Harris County. Below is a pie chart of the percentage of all 2024 distributions by precinct. Zip codes 77036, 77449 and 77077 were the areas where the greatest number of DVAF distributions occurred. There are a number of partner organizations that are located in the 77036-zip code or in the near vicinity and zip code 77077 is close to this zip code as well. 77449 is located north of I-10 and may be a result of trying to reach clients from the northern part of the county despite having minimal partner agencies there. **Figure 1**, on the following page, illustrates the percent of distributions across Harris County by precinct.

FIGURE 1. DVAF CLIENTS SERVED BY PRECINCT

Organizational Capacity to Disburse DVAF

Of the 20 partner organizations, seven – BakerRipley, Catholic Charities, Families to Freedom, GHIRP, JFAI, and The Landing - were new to DVAF in 2023. Along with the Church at Bethel’s Family, each of these organizations offered the ability to reach clients who do not access other domestic violence organizations. Many victims of domestic violence will never reach out to DV-specific organizations and choose to utilize support systems such as friends, family and faith communities. Creating these relationships in other community-based organizations offers new ways to reach our under and unserved populations. Through these agencies’ willingness to participate in the Fund, we are able to build greater capacity to do this work, as well as strengthen their ability to provide for clients in the future. Unfortunately, one organization, the YMCA, made the difficult decision to withdraw from the project.

Data Collection and Documentation

Collecting, verifying, and documenting information about client eligibility ensures that funds are accounted for and demonstrates the need within our community. For many domestic violence agencies, grant compliance and data collection are new activities. Most DV agencies do not typically capture proof of identification as many survivors flee without identification and collecting of the information can pose a safety concern. However, to provide funds, some form of documentation is required. To remedy this, the case manager can note that the client was fleeing and did not have identification. Additionally, clients need to sign a distribution form confirming receipt of the assistance received. To manage internal data, most agencies have an internal database to collect client information. For those that did not have a database, HCDVCC offered an Excel spreadsheet to document the information required. Organizations must collect proof of eligibility forms including: (1) proof of identification, (2) proof of Harris County residency, and (3) proof of income.

HCDVCC provides quarterly reporting related to spending and allocations to each agency. Additionally, awardees are re-evaluated as needed based on spending in 2023-2024 and projected spending for 2025 for each organization. **Table 6**, on the following page, illustrates the amount of funds disbursed to clients and the number of households and individuals served in 2024 for each agency.

TABLE 6. DISBURSEMENTS AND HOUSEHOLDS/INDIVIDUALS SERVED BY AGENCY

Organization Name	2024 Disbursements and Clients Served		
	Amount Disbursed	Households served	Individuals served
An-Nisa	\$65,976.79	131	358
Asians Against Domestic Abuse	\$116,896.71	61	154
BakerRipley	\$72,642.97	35	121
Bay Area Turning Point	\$99,052.85	81	184
Catholic Charities	\$15,624.38	41	128
Daya Houston	\$30,000.00	51	137
Families to Freedom	\$54,405.56	89	180
Family Ties	\$48,909.11	24	79
Family Time	\$36,226.83	38	91

The Landing	\$49,500.00	69	139
Total for Sub-contractors	\$869,855.83	978	2667
Harris County Domestic Violence Coordinating Council	\$240,376.42	229	664
TOTAL	\$1,110,232.25	1207	3311

*This is only direct client disbursements and does not include administrative, personnel, or operating costs.

High Risk Team

Domestic Violence High Risk Team (DVHRT)

A partner agency identified and referred a high-risk survivor to the Harris County DVHRT. Through a Danger Assessment, it was determined that the survivor was in the “Extreme Danger” category of risk of homicide. At the time, the harm-doer had a felony warrant for his arrest for Assault of a Pregnant Person. The pregnant survivor had fled her home, where she had been residing with the harm doer, to a temporary location with her children.

After becoming a client of HCDVCC thru the Harris County DVHRT initiative, the survivor was assessed for housing and basic needs, and as a result of her needs’ assessment, she was a recipient of the Domestic Violence Assistance Funds. This funding allowed her to make and attend doctor appointments, buy groceries, relocate to a confidential location, and more. She delivered a healthy baby in a new, safe home for her and her children. DVAF was also able to assist with daycare expenses, which allowed her to go back to work and become financially independent and able to take on the cost of the daycare expenses. With her new job and safe, stable housing, she looks forward to a better future for herself and her family as she attends community classes to obtain her GED to further her education.

HCDVCC facilitates the multi-disciplinary high-risk team for the county. The goals of the Harris County DVHRT are to decrease the domestic violence homicide rate, increase safety for survivors, and create a coordinated community response for improving access to services and accountability for offenders. By focusing on the high-risk domestic violence cases that are assessed through use of lethality assessment tools, our community can triage and prioritize those at highest risk for homicide with specialized and enhances multi-disciplinary case management. Harris County continues to lead the state in the number of domestic violence fatalities, and the DVHRT is committed to improving safety and reducing lethality. Families in need of services are assisted by an HCDVCC team Mobile Advocate for safety planning and connected to community resources to meet basic needs and trauma recovery needs. This includes navigation to a DV provider home for ongoing support and services. The majority of cases referred to the DVHRT originate from the Domestic Violence Division of the Harris County District Attorney's Office. The DVHRT model framework is built on four fundamental strategies:

- early identification of high-risk cases with an evidence-based and validated risk assessment tool
- engagement of a multi-disciplinary team
- ongoing monitoring of high-risk offenders
- enhancing victim services

HCDVCC's DVHRT Mobile Advocates address the unique and critical needs of high-risk survivors by providing mobile advocacy services to meet survivors where they are - both physically and emotionally. The number of near fatal and fatal domestic violence homicide cases continue to be critical concerns in our community. Systems and organizations increasingly struggle with the ability to meet the acute needs of at-risk survivors when referrals are made to them with over 75% of callers to emergency shelter services being turned away due to lack of space. The sheer volume of domestic violence cases within Harris County demands the need for multiple ways to connect with survivors to provide safety and assistance, and the High-Risk Team has become a recognized strength in improving this connection in our community.

The addition of DVAFF flexible funding with the DVHRT has a significant and important impact on the ability to increase safety for those fleeing. Victims who are actively fleeing have been assisted with emergency hotel stays when all shelters are full, transportation assistance to live with family in other counties and other states, rental and utility assistance to prevent eviction and homelessness, food and clothing, RING cameras to improve safety, funds to change locks, and new cell phones.

Innovative Initiatives

Developing Intervention Services for TBI

Neurofeedback

With the support of DVAFF funding, our community has developed new initiatives that have promising impact for improving interventions in our county. Trauma experts nationwide have provided training

on using nontraditional techniques to calm the mind and sympathetic nervous system in order to decrease the fight, flight or freeze trauma response. Only when this survival response is calmed can a survivor begin to tap into the prefrontal cortex of the brain for higher level functioning. Experts like Dr. Van der Kolk with the Trauma Research Foundation, Ruth M. Buczynski, PhD with the National Institute for the Clinical Application of Behavioral Medicine, Dr. Stephen Porges, and Dr. Gabor Mate have all emphasized the following techniques to assist trauma survivors to move forward toward healing and to be able to receive traditional talk therapy: neurofeedback, breathwork, meditation/mindfulness exercises, movement/exercise/walk, tapping, expressive arts, heart math, compassion, and support group/individual fun activities to encourage the release of dopamine which allows survivors to feel better and therefore more likely to be able to tackle the difficult path towards independent living and healing.

The Neurofeedback program is a project that implements a mobile program for those who screen positive for traumatic brain injury, PTSD, depression, hypervigilance/anxiety, or other negative symptomology as a result of trauma, both acute and chronic. Neurofeedback uses the brain's natural ability to restructure brainwaves into the healthy patterns needed for cognitive functioning and emotional self-regulation. Eve Valera, Ph.D., an associate professor of psychiatry at Harvard University and a leading researcher on Traumatic Brain Injuries (TBIs) among Intimate Partner Violence (IPV) survivors, hypothesizes that victims of intimate partner violence experience TBIs at a significantly higher rate than other high-risk groups like athletes or soldiers. The CDC estimates that there are 38 million women who have experienced IPV in their lifetimes and there is evidence of facial/head injuries and multiple strangulation attempts in 60-90% of IPV survivors. The low end of this estimate, 60%, is equal to approximately 23 million women in the US who are living with a TBI from IPV. That is 34,000 times more than NFL players and 85 times more than Iraq/Afghanistan Veterans. (<https://www.jstor.org/stable/48515473>).

With the support of DVAF funding, HCDVCC invested in the necessary equipment to implement the Neurofeedback program in May of 2023. Clients in the DV Housing collective and High-Risk Team are offered information and education about the intervention and there have been 25 clients enrolled and 211 neurofeedback sessions conducted since that time (including carryover clients from 2023).

The impact of this intervention is being measured by pre/post psychosocial scoring (GAD-7 and PHQ-9), staff observations and client self-reports, and detailed qualitative data and progress notes. The pre/post psychosocial tools have shown a reduction in the average scores on both the GAD-7 and PHQ-9 by 4 points and 7 points respectively. The GAD-7 is a brief measure of generalized anxiety disorder with scores up to 21. It consists of seven questions that assess the severity of various signs of anxiety over the past two weeks. Health professionals often use it to monitor symptom severity and response to treatment. For example, there were 3 clients that met the criteria for anxiety disorder at intake and 2 no longer did after their neurofeedback sessions. The PHQ-9 is a self-report assessment tool that screens for depression and measures its severity. It includes nine questions that align with the diagnostic criteria for major depressive disorder in the DSM-5. For example, there were 3 clients who had mild depression, 1 moderate, and 1 moderately severe at intake. After their neurofeedback sessions, the 3 with mild depression had either none or minimal, and the moderately severe and moderate, went down to mild depression. The following are qualitative narratives of staff observations or client self-reports on various neuro regulation intervention services including neurofeedback for 17 separate clients who received neurofeedback in 2024:

1. No more panic attacks, focused on personal and vocational goals. Improved sleep. Found her voice and confidence. Went on to speak publicly on Univision about DV in hopes of helping others end the cycle of abuse. Hopeful for the future and confident in her ability to overcome adversity.
2. Walking regularly, coping better with stressors, looking for work, hopeful for the future, understands that what happened to her was not her fault.
3. More confident, focused on his long-term vocational goals, improved relationship with his adult children, no longer in crisis, improved window of tolerance, hands no longer trembled in fear. Improved sleep and stamina throughout the day.
4. Stopped using cannabis. Reported improved ability to focus and creativity. Started going out more with friends. Started focusing on long term personal and vocational goals. Started reading more.
5. Improved, felt sense of social anxiety. Family reported he was able to go out in public with no noted symptoms of anxiety. He walked an entire Walmart store without feeling the urge to leave. This was a huge accomplishment (per his sister).
6. Able to find a job and have a better relationship with her kids due to MISC intervention and therapy with TSP. Client was able to save up and get her own place after completing the program and got a new full-time job.
7. After a few sessions, staff observed client engaging and making eye contact, smiling and laughing. Client reported feeling less angry and upset generally and when conflict arises.
8. After a few sessions, client reported no longer having headaches that began when her last traumatic brain injury occurred.
9. After completing neurofeedback, she reported being more hopeful and was able to stop herself from spiraling. Staff observed marked changes in her ability to self-regulate.
10. After ending all sessions, client reported before that she is sleeping better, feeling more awake and can handle her kids' issues in a calmer manner and with more understanding. Client is feeling better about her responses and actions towards her relationships with family and friends.
11. The client seemed visibly more centered and more able to engage in calm conversations and reflect on their feelings with less agitation.
12. After one session, staff observed client had more energy. Client reported feeling lighter and motivated to accomplish her goals.
13. After a few sessions, smiles, stated feeling less agitated when conflict arises.
14. After a few sessions, staff observed client had more energy.
15. At exit, client reported that she can sleep through the night now, not as emotional. Staff observed client was able to focus better, more organized and positive outlook, less depression and anxiety, much calmer during interactions.
16. After neurofeedback, client reported that after neuro she was better able to sleep, stay organized and not so quick to anger when things don't work out as anticipated. Completed TABC

and Food Handler Certification. Staff observed client appeared less depressed and noticed she didn't cry during conversations anymore.

17. Client reported minimal change.

Photobiomodulation (PBM)

Photobiomodulation (PBM) or transcranial near infrared light stimulation therapy is another innovative intervention strategy being explored at HCDVCC to mitigate the negative aftermath of TBI as well as showing promise for depression, PTSD/anxiety, and dementia. Improvements have been seen in cognition, memory and sleep for those studied suffering from TBI. Here are some potential benefits of PBM for TBI and the research cited:

Reducing inflammation - PBM can help reduce inflammation in the brain, which is a common symptom of TBI. An NIH funded study by Xuan et al. (2014) found that PBM reduced levels of pro-inflammatory cytokines in mice with TBI, leading to improved cognitive function.

Stimulating neurogenesis - PBM can also stimulate the growth of new neurons in the brain, which can help repair damage caused by TBI. An NIH funded A study by Oron et al. (2007) found that PBM increased the number of new neurons in the hippocampus of rats with TBI.

Improving mitochondrial function - PBM can improve the function of mitochondria, which are responsible for producing energy in cells. An NIH funded study by Naeser et al. (2014) found that PBM improved mitochondrial function in patients with TBI, leading to improved cognitive function and quality of life.

Reducing oxidative stress - PBM can help reduce oxidative stress in the brain, which is a common result of TBI. An NIH funded study by Hamblin et al. (2018) found that PBM reduced oxidative stress and improved mitochondrial function in a mouse model of TBI.

Research beyond what's cited above is being done by the transcranial device developers Neuronic, Vielight and Biomedical (dry qEEG with targeted PBM). Although more research is needed to determine the optimal parameters for photobiomodulation treatment, such as wavelength, intensity, and duration, studies suggest this could be a non-invasive and potentially effective alternative or adjunct therapy for survivors with TBI. HCDVCC has purchased 3 devices that provide PBM and have begun testing on staff with potential TBI or other cognitive and/or emotional struggles. In addition, an expert in both neurofeedback and PBM will be training the trauma support team to use these strategies separately or together for improved efficacy for those more resistant cases.

Harm Reduction/Violence Prevention Program

This program was created to address and reduce the prevalence of homicides linked to Intimate Partner Violence (IPV) by intervening with offenders. IPV impacts over **12 million individuals annually** in the United States (The Hotline), with **41% of women** and **26% of men** reporting experiences of contact sexual violence, physical violence, or stalking by an intimate partner (CDC). Tragically, nearly **four women are murdered daily** by intimate partners, with firearms involved in over **70% of these cases** (Everytown Research).

This program aimed to break cycles of violence by equipping offenders with tools to build healthier relationships, emphasizing communication, boundaries, equality, and self-esteem. The ultimate goal was to reduce recidivism, IPV-related homicides, and the harm caused to future victims.

Key Findings

The program provided services to **31 individuals** and achieved significant outcomes:

- **Reduced Recidivism:** Only **6.5% (2 out of 31)** of participants reoffended, compared to the national average of **40-50%** for IPV offenders (Bureau of Justice Statistics). *Both recidivism cases occurred before meaningful engagement with the program.*
- **Improved Self-Awareness:** Nearly all participants (**94%, or 29 out of 31**) reported they can now identify red flags in relationships and social interactions. This includes recognizing unhealthy patterns in friendships, family dynamics, and partnerships, allowing them to make more thoughtful decisions.
- **Career Progression:** **77% (24 out of 31)** secured employment or advanced toward career goals despite systemic challenges. The remaining **23% (7 out of 31)** identified career pathways and began taking steps to achieve their objectives.
- **Empowerment:** Participants frequently highlighted the support they received, describing the program as a turning point where they felt believed in and valued despite being written off by others.

These outcomes demonstrate the potential that the program has to be effective in fostering offender accountability and meaningful behavior change.

One participant's voice:

"Thank you for being there for me from day one. You gained my respect when I saw you take the clothes off your back to give to someone in need after walking in the rain and coming into class shivering. The support you offered, not only to me but to everyone you came in contact with, will never be forgotten. If it wasn't for you, I would've gone back and made poor choices. But you gave me hope again, and now I feel like my old self with a new purpose and a new vision. I won't let anyone take away this peace you've helped me find."

Evaluating Our Work

HCDVCC believes in the power of evaluation to give us the evidence and information necessary to make good decisions for future program investment. It is the best way to ensure that clients are being served effectively as well as ensure that these program dollars are put to good use. HCDVCC has employed Dr. Leila Wood, Professor and Director of Research and Evaluation, Center for Violence Prevention with the McGovern Medical School at UT Health Houston to design and implement a full evaluation of the DVAf funding. Work has included securing IRB approval, designing of survey instruments and tools, and interviews with participating agencies. Connections with all participating

agencies of the Fund were made in August 2024 and the survey link was provided to those agencies to distribute to new clients receiving DVAf assistance. Some preliminary findings include:

Improving Survivor Safety

- ✓ Addressing security concerns (Ring cameras, door locks, other safety technology)
- ✓ Gain access to housing and transportation that allows survivors to leave harm-doing partners
- ✓ Giving survivors their own financial resources
- ✓ Stabilizing transportation access to criminal justice and safety remedies
- ✓ Pay for legal fees for divorce, custody, or other civil remedies

Increasing Survivor Economic Stability

- ✓ Increasing housing stability (paying rent, deposits, application fees)
- ✓ Facilitating economic empowerment and stability (job training, education, computers for work at home jobs). Having seed funds to start small business
- ✓ Paying for childcare
- ✓ Transportation (fixing or getting a car) to go to work or school

Improving Survivor Physical and Mental Health

- ✓ Reducing stress
- ✓ Empowering survivors to meet their needs
- ✓ Having resources for food
- ✓ Having funds for appointments, testing, and other medical and MH procedures
- ✓ Funding for medications while awaiting insurance coverage

Stabilizing the Needs of Children

- ✓ Pays for child supplies and basic needs
- ✓ Allows for funds for child mental and physical health needs while insurance is pending

Facilitating Greater Connection and Trust

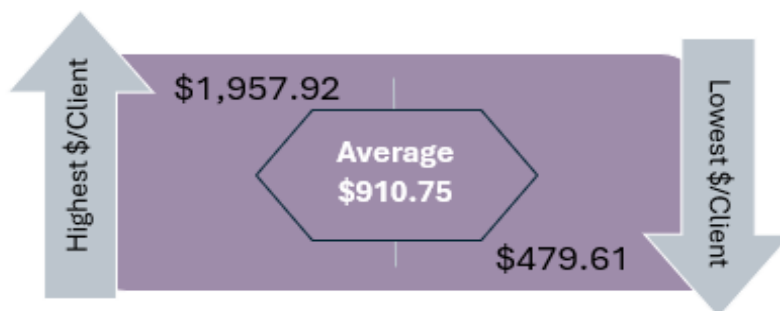

- ✓ Which means engagement in other helpful services (counseling, legal aid, economic empowerment support)
- ✓ Can reduce feelings of isolation and depression

Reducing Occupational Stress of Advocates

- ✓ Advocates can better meet survivor needs
- ✓ Advocates have more avenues to help people improve their own safety
- ✓ There is a clear process for the program, but it is flexible to both survivor and advocate use

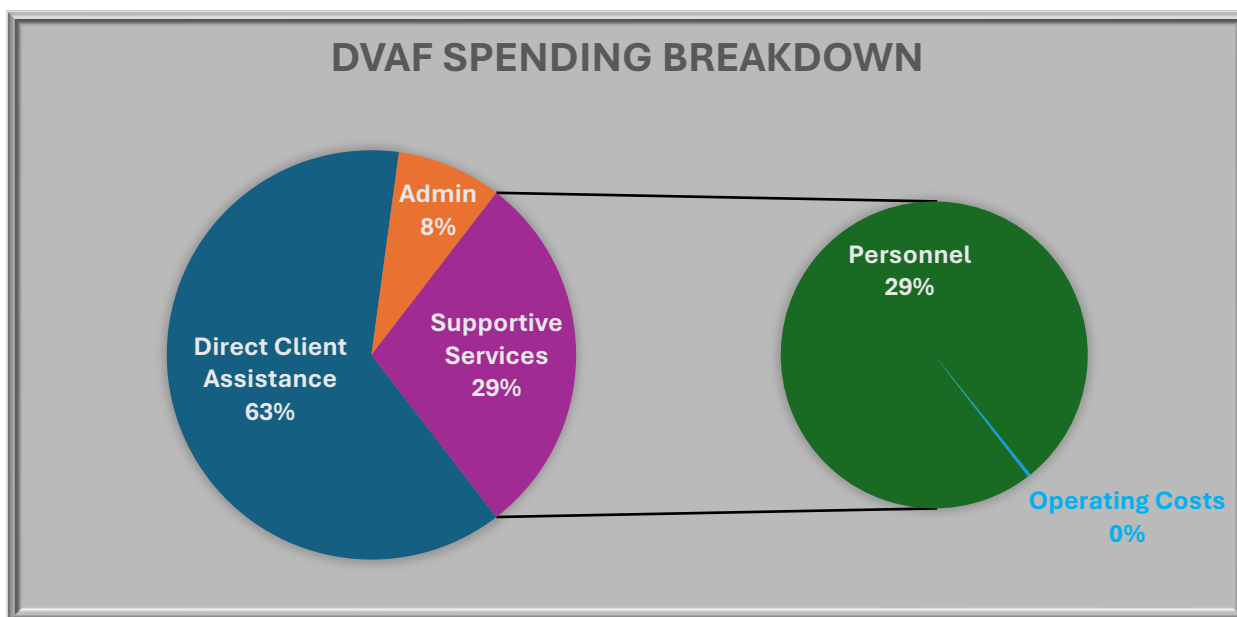

DVAF Spending in Numbers

As we explore and advocate for future flexible funding, it is essential to examine how current grant spending is allocated in two key areas: the average cost per client to increase safety and stability, and the overall cost of implementing the grant. In 2024, the DVAF program was able to provide assistance to over 1,200 households and impact over 3,300 individuals with an average of \$910.75 per household. Individual agency spending per client varied significantly, ranging from a high of \$1,957.92 to a low of \$479.61.

To put these numbers in perspective, consider that the average monthly grocery bill for a family of 4 in the Houston area often exceeds this amount. It is remarkable that life-changing support—centered on safety and stability—can be provided for less than what many families spend on basic food needs in a single month.

The DVAF grant supports 19 subrecipient agencies, each offering services in distinctly unique ways to reach as many survivors as possible. Due to the variation in how services and assistance are delivered, the cost of implementing the grant differs across agencies. Below is an overview of the overall cost allocation for the DVAF program. The 29% Personnel costs are associated with the agencies who chose to employ one or more staff to provide a specific service such as law services, mental health services, or hotline advocacy. These personnel were directly responsible for providing new services or expanding current services to the DV population.

Advocates Report

“The DVAF funding that our clients receive are very much needed and appreciated. It brings so much joy as an advocate to be able to assist the client with needs that they have after moving into a home with nothing.”

“We are able to assist survivors who have had to miss work due to their domestic violence and prevent them from being evicted. This reduces barriers on their journey to stability and safety.”

“We were able to move a client out of emergency shelter and into permanent housing for the first time in her adult life.”

Lessons Learned

As we worked through the first round of funding in 2023-2024, a common barrier to disbursing funds for several of the partner organizations relates to a given agency's cash flow. As this is a reimbursable grant process, many small agencies do not have cash on hand to facilitate the process, nor do they have the ability to obtain lines of credit. The work these agencies do is important and they serve critical areas and communities in Harris County. Therefore, we found it imperative to find creative ways to ensure agencies have the ability to support clients with the funding into 2025. HCDVCC staff have worked closely with these agencies to brainstorm solutions and streamline the reimbursement process to shorten the time between expenditure and reimbursement as much as possible. One solution we found to address this barrier was to allocate funds to these agencies and work with them through an MOU (Memorandum of Understanding) to provide flexible assistance through HCDVCC purchasing an identified amount of gift cards purchased with DVAF funds, and allocating those cards directly to the specific organization so that they can distribute to clients within their programs.

Some partner organizations new to DVAF have faced logistical challenges in implementing the disbursement process. Many of these agencies were accustomed to delivering services on a smaller scale through a single method that had worked well for them in the past. However, the need to distribute DVAF funds on a larger scale has often felt overwhelming and highlighted inefficiencies in their traditional approaches. In response, we work closely with agencies to introduce more efficient service delivery methods while simultaneously helping them build capacity. HCDVCC provides mentoring to agencies seeking assistance with improving their billing, documentation, and related processes. In 2023, agencies new to DVAF particularly struggled with adapting their data collection and reporting practices to meet DVAF's documentation requirements and to do so efficiently. To address this, HCDVCC developed targeted tools, including a Client Tracking Sheet (an Excel form) that outlines all required data categories for collection. Additionally, we launched monthly Office Hours, offering agency staff the opportunity to ask questions, discuss challenges, and receive real-time support. This additional support significantly improved the ease, quality, and consistency of reporting, documentation, and fund disbursement across participating agencies.

In Conclusion

The Harris County DVAF project is serving as a national model for how flexible funding can increase and expand avenues and pathways to safety that are victim-defined and survivor-focused. A recent case study highlighting this work was developed and presented by the National Safe Housing Alliance ([Harris-County-Case-Study.pdf \(safehousingpartnerships.org\)](#)). This study has been shared with the US Department of Health and Human Services and the Administration on Children, Youth and Families, Family and Youth Services Bureau, in collaboration with the National Resource Center on Domestic Violence. It is a beautiful example of how a community can be creative and focused on meeting the needs of those who have experienced trauma and amplifying how a community can intentionally focus efforts for meeting the needs of BIPOC communities.

Thank you to the Harris County Commissioners and staff members who worked to ensure that this project gained the support and confidence to meet critical needs of our most vulnerable community members. Thank you to the partners who work diligently to find ways to support families in our community. And most importantly, thank you to victims and survivors who show great courage in stepping out to seek assistance, increase safety, and find pathways for healing and hope. We are inspired by your courage and persistence.

DVAF IN ACTION...

Nothing can speak to the true power and beauty of this program louder than the voices of those who are the recipients of the support.

"I never thought this kind of thing (assistance) existed. I don't have words to describe how we all feel but I do feel hopeful for the future!"

- Survivor

We facilitated access to food and clothing resources, addressing immediate basic needs and helping survivors regain their independence. Through these efforts, we aimed to empower individuals and families to move forward in safer environments.

Clients were able to have some significant barriers removed from their journey towards self-sufficiency in the form of repairs to their vehicles that were not fully operational. This allowed these households to become more independent in terms of transporting their family and being able to access other basic needs as well as maintain employment.

We were able to assist many families with childcare so that clients could work, search for employment, attend job interviews, or allow them to focus on their entrepreneurship goals and development that leads to increased income, safety, and stability. These flexible funds allowed clients to meet their unique needs as they navigate their journey to safety, security, and financial stability.

Brief Partner Agency Descriptions

- ***An-Nisa Hope Center (An-Nisa)***

An-Nisa is a domestic violence organization located near Sharpstown that regularly works with survivors. Their goal is to spread knowledge about domestic violence prevention, mental health, and youth matters. They provide support to victims and survivors of domestic violence through crisis intervention, safety planning, needs assessments, and therapy. <https://annisa.org/>

- ***Asians Against Domestic Violence (AADA)***

AADA is a domestic violence organization located in southwest Houston that works to prevent violence against survivors of abuse from marginalized populations within the Asian American and MENA community in Houston, while working to strengthen and promote equal and healthy family relations. AADA bridges the gap in providing services to this community by addressing issues that would otherwise be kept behind closed doors. <https://www.aadainc.org/>

- ***BakerRipley***

BakerRipley has aspired to empower their neighbors to build a more promising tomorrow for themselves and their families. This aspiration is at the heart of their purpose and work. Through the use of their programs, interventions, and partnerships, such as the one they have with HCDVCC and DVAF, they are able to provide the opportunity to optimize earning potential, learning opportunities, sense of belonging, and health and well-being. <https://bakerripley.org/>

- ***Bay Area Turning Point (BATP)***

BATP is a domestic violence organization located in Webster that regularly works with survivors. They have a 24-hour daily hotline for survivors who need a safe and confidential place to talk. BATP's mission is to advocate to end domestic and sexual violence with a vision to bring peace for every woman, every child, every man.....every day. <https://www.bayareaturningpoint.org/>

- ***Catholic Charities***

For nearly 80 years, Catholic Charities has provided food, clothing, shelter and a network of support services to people of all ages and from all walks of life and religious backgrounds. With the DVAF award funds, they have been able to extend these services to help the vulnerable population of domestic violence survivors throughout the greater Houston area. <https://catholiccharities.org/>

- ***Daya Houston (Daya)***

Daya is a domestic violence organization with a mission to empower South Asian survivors of domestic and sexual violence through culturally specific services and to education the community in an effort to end the cycle of abuse. <https://www.dayahouston.org/>

- ***Families to Freedom***

Families to Freedom provides free transportation services to victims and their children who have experienced domestic abuse and family violence. They make it possible for victims and new survivors to get far away from abusive relationships. Families to Freedom's life-saving services include car rides to domestic violence shelters across Texas, road trips to family homes in other states, multi-state bus tickets, and fuel assistance to relocate far away. They serve shelter survivors as well as victims not yet in a safe place. <https://www.familiestofreedom.org/>

- Family Ties, Family Resource Services (Family Ties)**
 Family Ties is a children's and family crisis center. Family Ties strives to serve victims of family violence, sexual assault, bullying and other children's crisis issues. They support and empower child victims and their families to heal. Family Ties provides prevention, education and intervention services for children, families, schools, businesses, churches as well as community organizations which are necessary in eliminating violence while promoting a lasting, positive change. <https://familytiesfrs.org/index.html>
- FamilyTime Crisis and Counseling Center (Family Time)**
 FamilyTime is a domestic violence organization located in Humble with a mission to provide services and programs to encourage the mental health and wellness of the community as well as promote safety and support for the prevention of domestic and sexual violence. <https://familytimeecc.org/>
- Fort Bend Women's Center (FBWC)**
 FBWC is a domestic violence organization in Fort Bend with a mission to assist ALL survivors of domestic violence and sexual assault and their children to achieve safety and self-sufficiency, while striving to prevent violence against women. While they are located in Fort Bend county, they regularly serve women, men and children in the Greater Houston area. <https://www.fbwc.org/>
- Fresh Spirit Wellness (Fresh Spirit)**
 Fresh Spirit is a wellness program that works with domestic violence survivors. Their mission is to empower individuals impacted by the trauma of domestic violence by encouraging, educating, equipping and empowering victims/survivors confronted with unexpected challenges due to verbal, emotional, physical and sexual abuse by providing culturally appropriate, trauma informed, client centered crisis intervention services to help restore safety, peace, healing and wholeness to their lives. <https://www.freshspirit.org/>
- Galveston Houston Immigrant Representation Project (GHIRP)**
 GHIRP advocates for survivors through representation to ensure that they have equal access to due process in our complex immigration system. With DVAf, they have been able to increase their capacity and provide much-needed legal assistance to survivors where immigration status is often a tool in the abuse and control. <https://www.ghirp.org/>
- Houston Area Women's Center (HAWC)**
 HAWC is a large domestic violence organization located in Houston with a residential emergency shelter and a 24/7 hotline. They use a tailored, continuum-of-care approach to create empowering solutions for each of the clients and the issues they face. As they continue to grow and evolve, they are in the finishing stages of a new state-of-the-art facility, as well as regional service hubs throughout the community. <https://hawc.org/>
- Justice For All Immigrants (JFAI)**
 JFAI believes in reuniting families and safeguarding the rights of those seeking protection from persecution and violence. Their mission is to provide low-income individuals and families with affordable, high-quality immigration legal services and engage in immigration education and advocacy. With DVAf, they have also been able to increase their capacity and provide much-needed legal assistance to survivors where immigration status is often a tool in the abuse and control. <https://www.justiceforallimmigrants.org/>

- ***Katy Christian Ministries (KCM)***

KCM is an assistance ministry located in Katy. They serve their local community with their food pantry, resale store, crisis center, and other social services. They help local families fight poverty, food insecurity, domestic violence and sexual assault. <https://ktcm.org/>

- ***Northwest Assistance Ministries (NAM)***

NAM is an assistance ministry located near Cypress. They serve their local community through a wide variety of services, including emergency basic needs, housing services, and a family violence center. Their mission is to strive to meet basic human needs through Neighbors Helping Neighbors. <https://www.namonline.org/mission>

- ***The Bridge Over Troubled Waters (TBOTW)***

TBOTW is a domestic violence organization located in Pasadena with a satellite office in Baytown. Their mission is to offer support, provide safety and prevent domestic and sexual violence. They can provide a variety of services including crisis intervention, a 24-hour hotline, emergency shelter (Pasadena location only), safety planning, housing assessments, community education, primary prevention, case management, hospital accompaniments, court and police accompaniments, licensed on-site daycare, counseling, support groups, parenting classes, money management and life skills. <https://tbotw.org/>

- ***The Church at Bethel's (Bethel's)***

Bethel's is a ministry located near southwest Houston. They serve their church members and community through their food pantry, resale store, employment center, dental clinic, and counseling services. Their location is in an area where domestic violence is prevalent, and they report that many of their church members are dealing with domestic abuse.

<https://www.bethelsfamily.org/>

- ***The Landing***

The Landing serves women, men, and children in Houston who have experienced the sex trade. By serving anyone who has experienced the sex trade, whether they are an identified victim of human trafficking or not, they are therefore eliminating barriers to service and increasing victim identification. They help survivors find safety, empowerment and freedom.
